

SLIDE AXLE

XL SLIDE AXLE

Ideal for the towing industry, the XL Slider is available in 80,000 lb or 110,000 lb overall capacities. The XL Slider trailer features a 6½° load angle, a 17° dump angle, and improved hydraulics to save your equipment from unnecessary wear.

MULTI-AXLES

XL 130 HDG 3+3+2

XL Specialized Trailers works with customers to develop multi-axle solutions for any hauling need. With our variety of Jeeps, Power Boosters (Nitrogen Stingers), Boosters and Flip Axles, we custom-engineer a multi-axle trailer set-up just for you.

HYDRAULIC FOLDER

XL HYDRAULIC FOLDING GOOSENECK

The HFG offers a solution for large equipment that would otherwise require heavy-duty ramps to load. The hydraulic low incline neck adjusts to uneven terrain so you can load and unload almost anywhere. XL 100 HFG and XL 110 HFG models are available.

XL SPECIALIZED TRAILERS

XL Specialized Trailers offers customized solutions to your hauling challenges. Founded on innovation and commitment to quality, XL has earned its reputation as a premium heavy haul trailer manufacturer through years of providing uniquely resilient, efficient, solutions-based products.

DESIGNED FOR YOU.

Our custom-engineered designs address the equipment you haul and where you haul it. Our long list of options allows you to fully spec out a trailer to fit your needs. Upper flange reinforcement, various outriggers, winches, heavy-duty wheel covers, multiple tie-down solutions, flip necks and front flip ramps are just a few examples you may choose to add.

BUILT TO LAST.

When we say built to last – we mean in every aspect of manufacturing. From robust designs to superior products and workmanship, the only corners we cut are the ones from sheets of steel.

#1 IN QUALITY. #1 IN RESALE.

XL's I-beams are made from one-piece web and flange, and then welded on all four seams. Using heavy-duty materials: T1 flange and 80K web, puts us at #1 in quality in the industry. Combine that with our top-of-the-line beam fabrication, cut & weld processes, and rigorous quality checks and you have a trailer ranking #1 in resale value.

CONSTRUCTION HEAVY HAUL TRAILERS

LOW-PROFILE HYDRAULIC DETACHABLE GOOSENECK

The core construction heavy haul lowboy, XL's Low-Profile HDG delivers all the essentials and more: 1 3/8" raised Apitong, chain slots on 24" centers, swing out outriggers, 2 chain slots on each bolster, 32° rear transition, and 5 ride height positions. A low-profile neck allows for a scraper to ride over the neck, while the open boom trough and the deepest bucket well in the market enables safe and low loading of an excavator bucket.

- Full 26' in the well, 53' OAL
- Rated at 110,000 lb overall and 100,000 lb in 10' concentrated
- 24" loaded deck height
- Optional bolt-on heavy-duty or medium-duty wheel covers
- Removable heavy-duty swingouts

XL 110 LOW-PROFILE HDG: 18" DECK

- Full 26' in the well, 53' OAL
- Rated at 110,000 lb overall and 110,000 lb in 16' concentrated
- 18" loaded deck height
- Clears low bridges without needing a drop-side or beam deck
- Flip axle and booster capable

- Full 26' in the well, 46' 6" OAL (also available as 44' 6" or 48' OAL)
- Rated at 80,000 lb overall and 80,000 lb in 10' concentrated
- 22" loaded deck height
- Lightweight design
- Flip axle capable

XL 80 LOW-PROFILE HDG

- Full 26' in the well, 53' OAL
- Rated at 120,000 lb overall and 110,000 lb in 10' concentrated
- 24" loaded deck height
- 36" flip neck provides 146" of swing clearance
- Prepped for a 2 axle booster

XL 120 LOW-PROFILE HDG + FLIP AXLE

T-SERIES TRAILERS

XL TAG & XL TILT TAG

XL Tags and Tilt Tags are available as a 2 or 3 axle, in four capacities with a variety of deck lengths. XL Tags come with a 6' beaver tail with a 10 degree load angle. The Tilt Tag deck has a 12 1/2° load angle with a knife edge for loading and unloading without ramps.

XL 60 STEP DECK: T-SERIES

Choose from 48' or 53' OAL, and one of four axle spacing options (49", 54", 60" or 10' 1") to build the trailer best suited for your needs. The 53' version is available with a 6' beavertail and spring assist ramps to make loading much faster. SDs are rated at 30 ton.

BOTTOM DUMP

XL BOTTOM DUMP

XL Bottom Dumps, available in a 2 or 3 axle, serve the construction and aggregate markets. Reinforced 10 gauge steel sidewalls and ASTM A-572 steel gates provide durability, while a 96" x 193" hopper opening offers the largest hopper you will find.
